[Portfolio](#)

I'm a Product Designer with 4+ years of experience building and designing mobile apps, desktop applications, and systems. I enjoy turning complex problems into simple, thoughtful solutions based on user-centered principles. Today much of my work happens alongside AI tools to boost productivity, accelerate research and build workflows more efficiently. I have a proven ability to own end-to-end design, from concept to pixel-perfect execution, delivering measurable product value while collaborating effectively with cross-functional teams.

Employment History

UX/UI Designer at Oddity | July 2023 - June 2026

- Led end-to-end UX design to drive revenue, conversion, and engagement.
- Owned full design cycles from concept through research, design execution, and continuous improvements.
- Led new brand design, shaping visual identity and product experience.
- Conducted user research through interviews, usability testing and behavioral analysis.
- Created wire-frames, mock-ups, user flows & prototypes focusing on user-centered principles.
- Collaborated cross-functionally with Product, R&D, and customer-facing teams.
- Clearly and effectively communicate design decisions to stakeholders.
- Designed high-quality experiences across web, desktop, and mobile.
- Integrated AI tools (Cursor, Claude, Figma Make) into the product design process to speed up research, design exploration, prototyping, and developer handoff.
- Built AI-driven product matching experiences (e.g., quiz-based personalization).

Product Designer at Skeep (SaaS - B2B) | June 2022 - June 2023

- Simplified complex workflows into intuitive, user-friendly experiences.
- Led application redesign, defining new interface and behavior.
- Create user scenarios, journey map, wireframes, UI designs & prototypes for full product cycle.
- Drove product improvements and new features alongside Product Managers and R&D.
- Conducted user research through customer interviews, competitor analysis, and market trends.
- Led QA process for internal system.
- Proficient in Figma and Adobe tools (Photoshop, Illustrator, After Effects).

IDF Commander of Basic Training | July 2013 — July 2015

Education

- UX/UI design, Netcraft | Aug 2021- Feb 2022
- UX Design, John Bryce | June 2021 — July 2021
- Interior Design, Shenkar School of Engineering & Design | Oct 2019 — Oct 2023
